Objective

Passionate and self-driven Junior Developer with experience in web development and collaborative projects. Eager to contribute technical skills and creativity to C5T Corporation's innovative team. Experienced in HTML, CSS, JavaScript, and version control through Git/GitHub. Looking for an opportunity to apply my knowledge and grow in a mission-driven environment.

Skills

- **Languages & Frameworks:** HTML, CSS, JavaScript
- **Version Control:** Git, GitHub
- **Development Tools:** VS Code, Git Bash
- **Software Documentation:** Basic experience writing software documentation
- **Communication & Collaboration:** Strong interpersonal skills, team collaboration, and problem-solving
- **Microsoft Office:** Word, Excel, PowerPoint

Education

Konoha High School
Expected Graduation Date: May, 2027
Relevant Coursework: Computer Science, Web Development, Math

Experience

Junior Web Developer (Personal Project)
Self-directed | March, 2025 - Present

- Designed and built a personal website using **HTML**, **CSS**, and **JavaScript**, ensuring a responsive and user-friendly design.
- Managed and updated codebase with **Git** and **GitHub**, ensuring version control and collaborative practices.

- Gained familiarity with **VS Code** for efficient coding and debugging, applying industry-standard practices in web development.
- Developed problem-solving skills by troubleshooting issues related to front-end design and functionality.

Participant, Code Crew HS Spring Break Camp
Code Crew | March, 2025

- Collaborated with peers to learn new programming concepts and apply them in real-world scenarios.
- Worked with guidance from senior developers and instructors to gain hands-on experience with coding, debugging, and testing software.
- Participated in team projects, learning the fundamentals of software integration and troubleshooting in a development environment.

Projects

Personal Portfolio Website

- Built a portfolio website from scratch to showcase my web development skills and projects.
- Integrated **HTML**, **CSS**, and **JavaScript** to create an interactive, responsive design with dynamic content.
- Utilized **Git** for version control and **GitHub** for hosting and collaboration.
